

WORLD-CLASS ORTHOPAEDIC CARE COMES TO BROADWAY – SERVING THE COTSWOLDS AND BEYOND

In May 2026, a significant new destination for Private Specialist Healthcare will open in one of England's most distinguished settings, as the **Cotswold Knee and Hip Clinic** launches within **New Barn Close Surgery in the village of Broadway**, offering a highly specialised Consultant-led service dedicated exclusively to knee, hip and sports injury care.

Situated within The Cotswold Suite, the clinic has been created to answer a growing demand for exceptional orthopaedic expertise delivered locally, discreetly and without compromise. For residents across the Cotswolds and the Cotswold villages and beyond, this represents a new level of access to advanced private musculoskeletal care previously unavailable within the region itself.

At the centre of the clinic is **Mr Nadim Aslam** one of Britain's most accomplished Consultant Orthopaedic Surgeons, whose reputation has been built on surgical precision, innovation and an unwavering commitment to patient outcomes. Trained at the internationally renowned **Nuffield Orthopaedic Centre** in Oxford, followed by advanced fellowship training in Toronto, Mr Aslam's career has been shaped by some of the most respected centres of orthopaedic excellence internationally.

Over the course of his distinguished career, Mr Aslam has performed more than 6,000 joint replacements and has become widely recognised for his expertise in all aspects

of knee and hip surgery including arthroplasty, arthroscopy and ligament reconstruction work. In 2025, he achieved formal recognition as the **No.1 Robotic Knee and Hip Surgeon in Great Britain for Private Practice**, reflecting both surgical volume and leadership within one of the most rapidly advancing areas of orthopaedic medicine.

As one of the earliest adopters of robotic-assisted joint replacement surgery in private practice, Mr Aslam has helped shape the modern standard for precision-led treatment. Robotic technology allows highly individualised surgical planning and enhanced implant positioning, often resulting in improved function, faster recovery and greater confidence for patients considering joint replacement.

The opening of the Cotswold Knee and Hip Clinic brings that same level of expertise into an environment designed around privacy, ease and personal attention. It is currently the only dedicated service of its kind within the Cotswolds focused exclusively on knee and hip conditions, offering direct Consultant access for patients who expect both excellence and efficiency in their healthcare experience.

The clinic will provide expert assessment and treatment for a wide range of conditions, including arthritis, persistent knee or hip pain, ligament injuries, meniscal tears, cartilage damage, tendon disorders and complex sports injuries. For many patients, particularly those who lead active

and demanding lives, early specialist review can make a profound difference to both immediate comfort and long-term mobility.

This is particularly relevant in the Cotswolds, where an active lifestyle remains central to daily life. Whether through equestrian pursuits, golf, tennis, walking, cycling or country sports, preserving freedom of movement is often inseparable from maintaining quality of life itself. The clinic has therefore been designed not simply around treatment, but around sustaining independence, performance and confidence.

Consultations will offer detailed specialist assessment together with tailored advice on conservative treatment pathways, injection therapies, rehabilitation planning and, where necessary, onward access to advanced surgical care including robotic-assisted procedures.

Integral to the clinic's ethos is the experience surrounding the treatment journey itself. Supporting this is **Katie, Mr Aslam's dedicated Business Manager**, whose role is to ensure every patient pathway is delivered seamlessly from first enquiry onwards. This concierge-style approach allows each patient to feel personally supported throughout their journey, with care that reflects the expectations of a premium private service with a level of attentiveness increasingly valued by private patients seeking clarity, discretion and efficiency.

Although conceived with the Cotswolds' discerning clientele in mind, the clinic is open to patients from any region seeking access to highly specialised orthopaedic expertise in an elegant and accessible setting.

The arrival of the Cotswold Knee and Hip Clinic in May 2026, marks more than the opening of a new medical service; it introduces a new standard of specialist orthopaedic care to the region — one that combines internationally recognised surgical leadership with the calm assurance of truly personalised care.

For enquiries or appointments, patients are invited to contact the Booking Team on: **01905 362003**
